LIVING ROOM SOFA

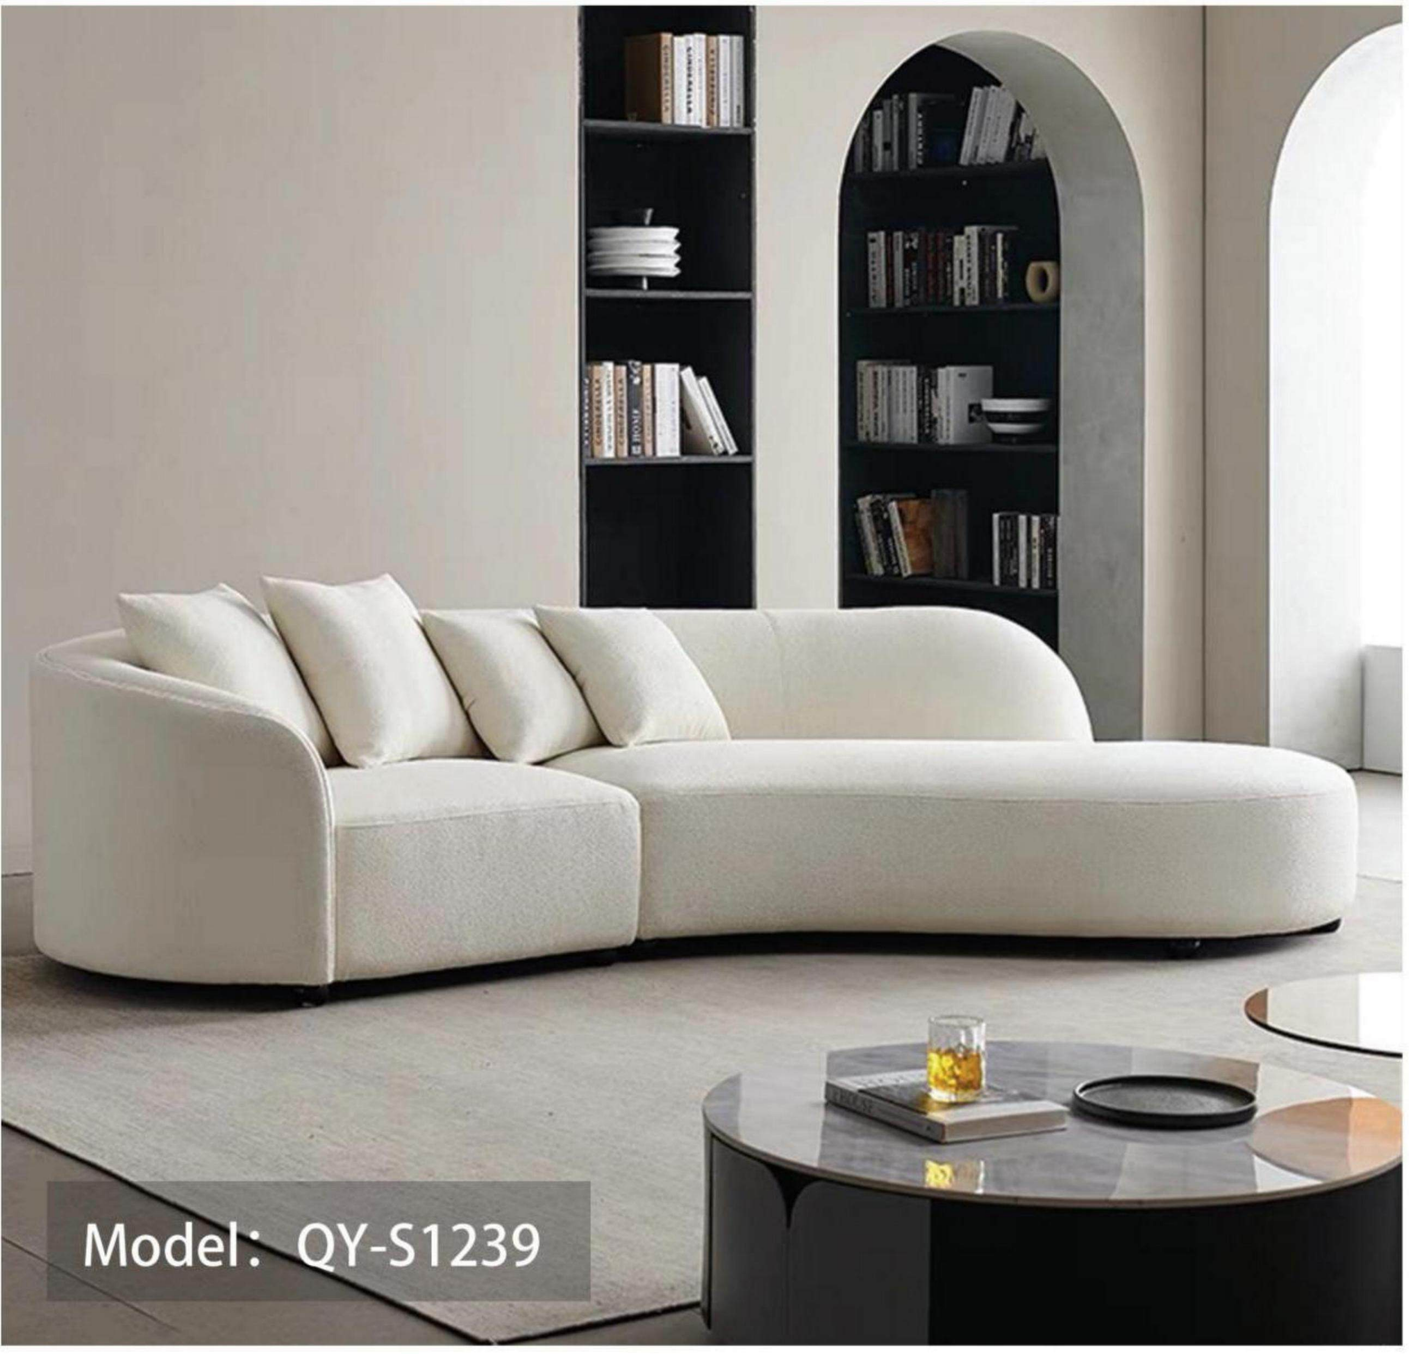

The geometric shapes with architectural style have been greatly improved with a large number of new additions, and the highly available system has been greatly improved. The Tokyo sofa system has been redesigned to fully promote the widest possible combination of elements, and now has the ability to reconfigure throughout its entire lifecycle so that it can grow and adapt to new situations. The Tokyo sofa system has now been expanded to include new curved seat elements, corresponding backrest elements, and other circular elements at selected depths. Curved seats allow for the creation of large, sweeping curved sofas, or other open angle sofas. The other circular elements aim to provide a solution to expand the sofa configuration at both ends in an open and enticing way. The addition of these new elements makes almost all imaginable sofa combinations possible and showcases powerful architectural soft seating solutions in indoor spaces. In addition, they allow Tokyo to invite relaxed use and surrounding behavior, creating a vibrant and cool enhancement for life.
